

Assembly Using Wood Fuel

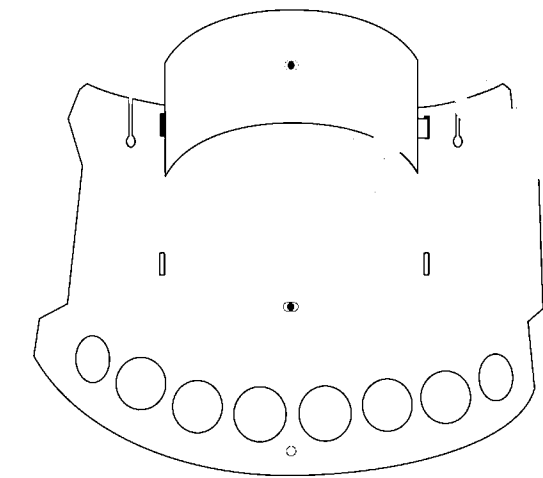

Assembly Using Alcohol Fuel

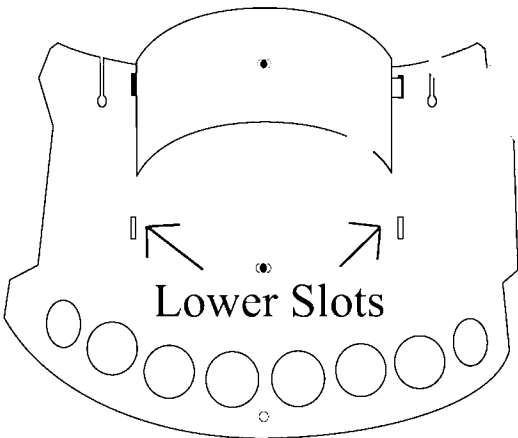

Important!
Pot support tabs are down for wood and up for alcohol.

Step 1

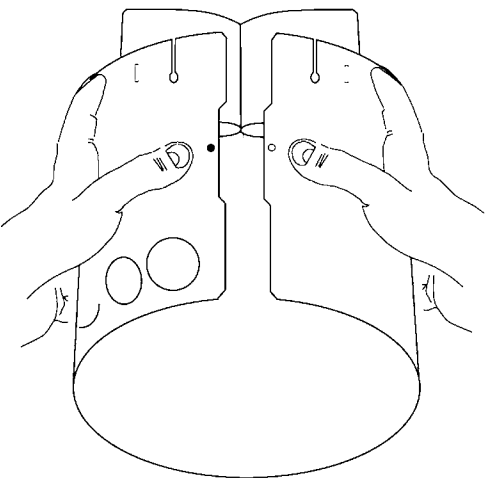

Attach pot supports to the upper closed slots in the stove sides. *Most of the pot support will be above the top of the stove side.*

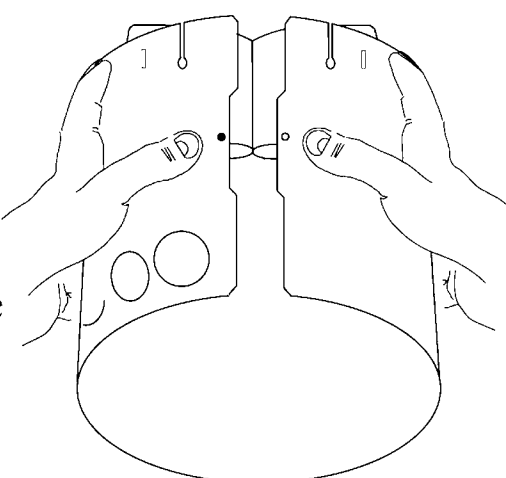

Attach pot supports to the upper closed slots in the stove sides. *Most of the pot support will be below the top of the stove side.* If using a pot small enough to fit inside the stove, you can increase efficiency by using the lower set of closed slots.

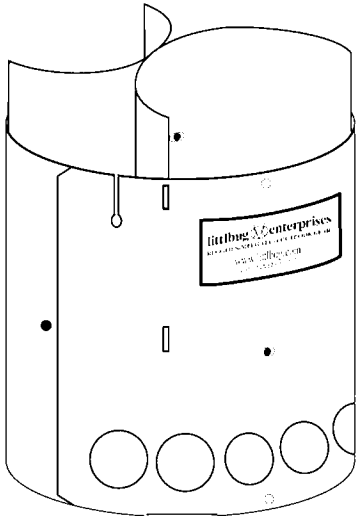

Step 2

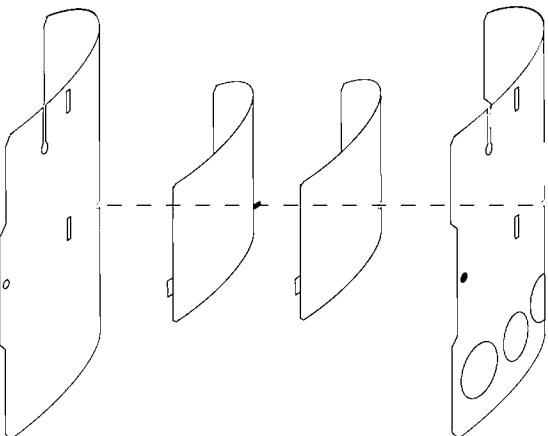

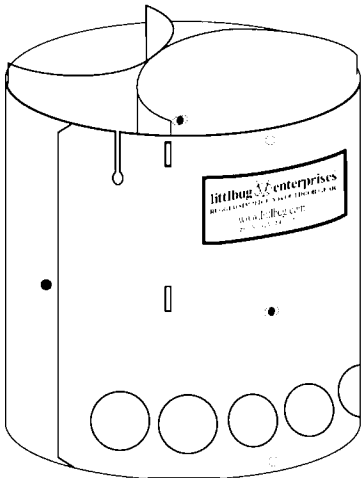

All three side edge tabs go inside the stove. Make sure all three assembly rivets enter their holes.

Stove Assembled

Place stove over your alcohol burner (not included).
